All members should shoot the 100 targets. There is money to be made in the Free Calcutta! The payout will be based on the total of both shooters scores combined.

Your team handicap yardage is the average of total weeks minus the first and last week’s scores. These yardages will be posted on Saturday night. Scoring is on a total of 500 targets per team within each division.

Alternates will be drawn at random for the teams unable to fill a full squad of regular members. A regular member is considered as one who has shot not less than 1/3 of the season (7 weeks). Since one cannot shoot for a match against their team alternates will be drawn from outside their division.

Trap Assignments:

Last place teams in each division will be the first squads out on Sunday. You will shoot 50 targets per trap. Shoot 25 then get your next box of shells & shoot 25 on the same trap then rotate traps and do the same.

Division	Traps
A	1 & 2
B	3 & 4
C & Alternates	5 & 6

The arrangement is based on a yearly rotation system

Don’t forget each team has a required chore and we need everyone pitching in to make this a successful and fun shoot.
